WORK EXPERIENCE

Senior Software Developer

CensaNext System Pvt Ltd, Bangalore

March 2023-Aug 2023

PROJECTS:

BenchMarker Admin Portal

- Identify and fix frontend-related bugs, issues.
- VAPT (Vulnerability Assessment and Penetration Testing) is implemented in this Application like identify potential vulnerabilities, such as weak password policies, session management issues, input validation problems, etc.
- Implement proper error handling to avoid exposing sensitive information that could be used by attackers to exploit the application.
- Implemented Google Maps in your web application using the "google-maps-react" npm package.
- I worked on Redux with Redux Thunk middleware in this project.

Procure to pay

- I started this project from scratch, I created whole folder structure according to the functionality.
- I implemented OTP based login, dashboard and many more. Implement error handling for cases like OTP request failure, incorrect OTP submission, or expired OTPs.
- I implemented Redux Toolkit with Redux Saga middleware is a powerful combination for managing complex state and handling asynchronous actions in a React.js project.
- I integrated Stripe payment gateway that supports multiple payment methods, including credit/debit cards. It has extensive documentation and provides excellent client libraries for React.js and other frontend frameworks.

Software Developer

Treosoft IT solution pvt ltd, Bangalore

Sept 2022-Mar 2023

I have been working as **React js Developer** at Client Company "**Censa Next Systems Pvt Ltd**" (Subsidiary of Waycool food and products Pvt Ltd).

Quality Digitalization

- Identify and fix bugs reported by users or discovered during testing. Analyse and debug issues to find the root cause and implement solutions.
- Contributing in all phases of the development lifecycles.
- Added searching and filter functionality.

Software Developer

Appright Software Solutions Pvt Ltd, Bangalore

Jan 2020-Jul 2022

PROJECTS:

Stronger Me" Admin portal

- Building reusable components and front-end libraries for future use.
- Added searching and filter functionality.
- Integration of API's.
- Using JIRA project management tool for monitoring the offshore work and providing technical help to offshore team of their JIRA tickets.
-

"Lopes Pre Eval" Web Application

- Designing UI's part by using HTML, CSS, Material & React.
- Structure and configure project.
- As a frontend developer, following the Figma design is an essential part of turning a visual design into a functional and interactive web application
- Set up your development environment with the necessary tools, including code editors, version control, and package managers.
